## Pittman Consigned to Political Ash Heap

Regardless of the attempts of the yellow press to credit Key Pittman with the modification of the four-power peace treaty, the fact stands glaringly forth that it was none other than Senator Cabot Lodge who introduced the correcting resolution to protect citizens of this country from Japanese aggression, and not Senator Pittman.

It was Pittman that saved the day, as the yellow journals would attempt to have its readers believe, then why was it not Pittman that introduced the resolution instead of Henry Cabot Lodge, one of the brainiest men in the United States, and a man who can be depended upon to protect the interests of the whole people?

It is evident that the lambasting that John-on, Borah, LaFollette, France, Pittman, et al., were given by the press of the nation for their attempts to throw a wrench in the wheels of progress, as enunciated and set forth by the present Republican administration, proved an object lesson, and Pittman was the first one to realize that he had made the most serious mistake of his whole political career. He is now squirming under the wrath of his former supporters and rather than be deprived of votes that he received six years ago, he now attempts to steal plunder that belongs to Senator Lodge and other good Republicans, with a few scattering Democrats, such as Oscar Underwood, the minority leader in the senate.

## Employment Conditions Are Improving

Some very definite figures to prove that the tide of business depression has turned and that the worst is over were made public today by the president's conference on unemployment. Reports from the United States employment service bureaus showing the trend of unemployment is the entire country have been charted and indicate a distinct gain.

The mass of statistics dealing with the hundreds of thousands of applicants and the jobs available for them, have been figured on a percentage basis, and it comes out that for every 100 jobs available at the various employment bureaus, there were 226 applicants in January, 265 in February and 194 for the first ten days in March, showing a gradual drop. In other words, there were only jobs in January for 44 per cent of the applicants, while in March the number had gone up to 51 per cent. Assuming that 3,500,000 were jobless in January, this shows work for 245,000 persons, or more than the population of Delaware.

For every 100 registrations, 23 found jobs in January, 41 in February and 43 in March. With the falling off in applicants there has been a corresponding gradual increase in the number for whom work is found, which figures out at a 5 per cent gain.

Officials of the conference are now a good deal concerned as to the best methods to bring about the salvage of the many men who, during the winter, have been forced from the independent into the dependent class. "There is no doubt, I am afraid," said Arthur Woods, chairman of the emergency committee of the conference, "but that there are a great many thousands of men who have been entirely self-respecting and self-supporting but who have been driven through the stress of the times, without fault of their own, to become public dependents. From points of view both of humanity and of the

conservation of man power of the country, these men must be helped back into the independent class. What are the best ways to do it is our problem today."

## Season of Activity Now at Hand

The signs of the times continue to indicate a general revival in mining throughout the various sections of southern Nevada, with Tonopah serving as the main feeding center. Enlarged development which has been inaugurated upon a number of the larger properties in the Tonopah district proper, will shortly be followed by a great deal of activity in a number of outside districts and indications at this writing are most favorable for a season of great prosperity manifesting itself within the immediate future.

Hornsilver, the boom camp of Esmeralda county, still continues to attract much attention and that district is beginning to teem with activity, according to those familiar with conditions. New mineral finds of great promise are being reported with such frequency that it is hard to keep a line on development, but those interested are highly optimistic regarding the future.

Royston is again making considerable noise, due to the discovery made on the 300 level of the Hudson shaft workings, with numerous finds reported near surface from properties adjacent. It has been learned that there are two deals pending that promises to inject new life into the camp at an early date.

Argentine owners of property are awaiting the melting of the snows that they may inaugurate well directed campaigns of development, and even during the past winter months important mineral finds have been made near surface which give indication of the ore shoots being persistent.

Bellevue, one of the oldest silver districts in Nye county, will be receiving much attention within the near future, while Clifford, Silver Bow, Arrowhead and Eden creek are not being overlooked by any means. Over at Manhattan the boosters anticipate a prosperous summer and fall, and with good weather at hand the gold camp of Nye county should again proceed to give a good account of itself.

## Reason is Plain

(Extract from note of Secretary of State Hughes to Italian Ambassador Ricci, declining to participate in European conference at Genoa.)

"I regret to inform your excellency that, as a result of this examination, it has been found impossible to escape the conclusion that the proposed conference is not primarily an economic conference, as questions appear to have been excluded from consideration without the satisfactory determination of which the chief causes of economic disturbance must continue to operate, but is rather a conference of a political character in which the government of the United States could not help fully participate. This government cannot be unmindful of the clear conviction of the American people, while desirous, as has been abundantly demonstrated, suitably to assist in the recovery of the economic life of Europe, that they should not unnecessarily become involved in European political questions."

## Copper Market

Stagnation and stronger price quotations are practically synonymous in the copper market. Metal movement is at a virtual standstill against "Copper Combine's" posted schedule close to the 13 cent level. The outside market is somewhat lower and correspondingly less stagnated.

New copper production is just beginning to be felt. United Verde Extension is on a 3,000,000 pounds monthly output basis. Anconda has just turned out its first metal in a year, with 7 mines in operation, and smelter production at the 50 per cent capacity rate of 11,000,000 pounds a month.

## REWARD

A reward of \$100 will be given for the recovery of bullion stolen Thursday morning from the American Express company truck, and \$100 additional reward for information leading to the arrest and conviction of the thief.
